

PREMIERONE™

PREMIERONE™ HAS SOLUTIONS FOR ALL YOUR INDOOR AIR QUALITY PROBLEMS

The Centers for Disease Control and Prevention presents this analysis of the causes and aggravation of allergies.

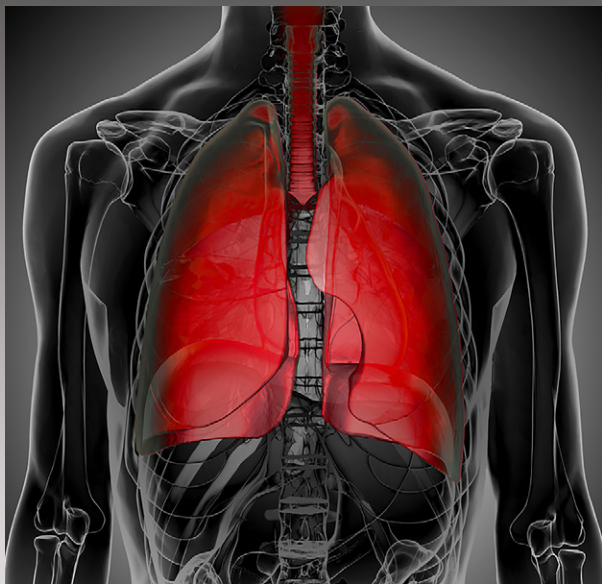

“Only 10% of homes in the USA have an efficient air cleaning system.”

ASHRAE

Although you may not be able to see, smell, or touch it, air pollution impacts the health of everyone.

Why do we get more colds and flus in the winter than in summer?

Winter days are shorter which gives us less ultraviolet light from the sun. Ultraviolet light kills germs. We bring Mother Nature's natural benefits from the sun into your home through your heating/cooling system.

Our lungs act as filters preventing contaminants from entering the blood stream. This is effective for the particles larger than 4 microns but most (98%) of these contaminants are smaller than 1 micron. It is critical to remove these microscopic particles to achieve healthy indoor air quality.

There are 40 million allergy sufferers in the United States who, like most people, spend 90% of their time indoors.

"Old methods used to clean inside air simply don't work"

University of California - Berkeley - Wellness Letter

"As a result of today's energy efficient, tight or closed building construction, the air in our homes and workplace is always 2-5 times more polluted than the worst exterior air."

Environmental Protection Agency

"Mutant strains of the microbials (germs) that cause diseases have become resistant to the antibiotics used to kill them."

Centers for Disease Control & Prevention

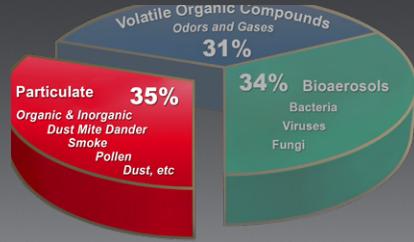

UV systems control bacteria, viruses and fungi.
UV systems with odor control also oxidize gases and toxins.

Polarized media air cleaners trap smoke, dust, and allergens better than filters purchased at retail and do not restrict airflow.

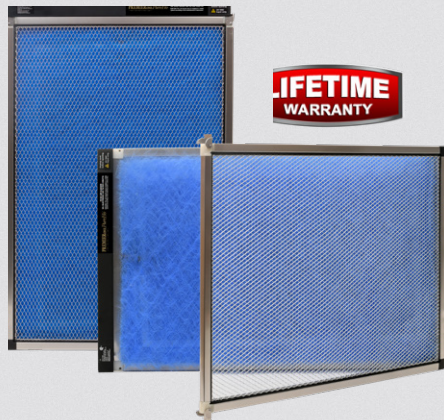

Take control of your indoor environment and stop suffering bouts with allergies, influenza, colds, lethargy, sleeplessness, skin and respiratory irritations.

Clean air is your passport to a healthier life.

ALLERGIES ASTHMA AND HAY FEVER

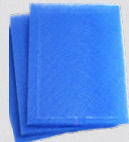

- Control smoke, dust, and allergens.
- Remove dust mite debris along with the smallest allergens that trigger asthma and other allergic reactions.
- The most affordable high performance product that fits your existing heating/cooling system.
- Does not restrict airflow more than conventional filters.
- Quiet operation, easy to maintain.

PREMIERONE PureFlo™
P6100

Polarized Media Air Cleaner

Replacement media is sold in handy three-packs.

LIFETIME WARRANTY

and/or

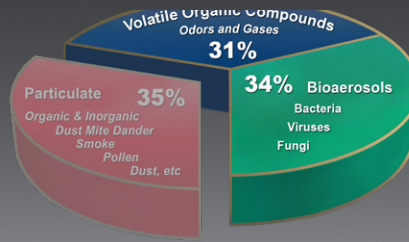

7-YEAR WARRANTY

PREMIERONE PureFlo™
HP500

Whole House HEPA Air Cleaner

GERMS AND ODORS

- Germicidal UV is the trusted method used in hospitals.
- Powerful UVC germicidal lamp provides single pass killing.
- Controls bacteria, viruses and fungi.
- UVV lamp controls odors by oxidizing gases and toxins.

PREMIERONE UV systems duplicate the power of the sun to kill germs and remove odors.

MUV-403H
Germicidal UV with Odor Control

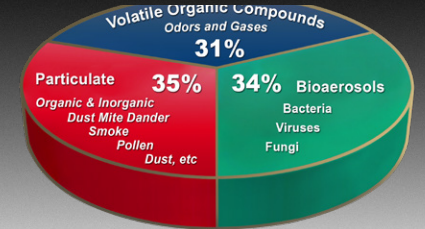

US Patents 7,597,856 & 8,062,589 B2

LIFETIME WARRANTY
